

HOSTING SERVICES

Savvis Dedicated Burst Option

Savvis has expanded its dedicated compute service offerings with the Dedicated Burst Option (DBO), assuring that dedicated infrastructure is available to your business when you need it. Seasonal peaks or unpredictable business events can spike the demand on your IT infrastructure. The inability to address this peak demand head-on can be costly by slowing down new customer acquisition, detracting from customer satisfaction, and causing severe damage to your brand image. Your IT environment should never be an inhibitor; rather it should answer to the ever-changing needs of your business.

For most companies, IT Infrastructure is not a competitive differentiator, unless your IT environment can not flex to meet the changing demands of the business and your competitors can. Savvis can help deliver a cost effective, high performance agile IT environment without sacrificing speed to market, increasing your competitive advantage.

Savvis Compute Service - Dedicated Burst Option

Savvis understands that flexibility and cost are essential components of any hosting solution. We offer a DBO solution for our compute customers who need to balance assurances that additional computing infrastructure is readily available without the cost of having hardware stand idle. DBO allows customers to accommodate for unforeseen business changes with peace of mind, knowing that sufficient IT resources will be pre-provisioned and easily accessible. This quickly reduces the normal standard wait cycle to order, provision, install, test, and turn-over IT infrastructure from weeks and months to days and hours.

Savvis DBO Advantages:

- Fully customer-dedicated infrastructure (not shared)
- Rapid scalability
- Enterprise-class reliability
- Flexible business contract terms
- Low-cost option for pre-provisioning solution
- Addresses demand peaks for:
 - Seasonal business peaks and troughs
 - Interactive Web promotion campaigns
 - Large media and news events
- Software-as-a-Service (SaaS) applications

About Savvis

Savvis, Inc. (NASDAQ:SVVS) is an outsourcing provider of managed computing and network infrastructure for IT applications. By outsourcing to Savvis, enterprises can focus on their core business while Savvis ensures the quality of their IT infrastructure. Leading IT organizations around the world have selected Savvis to help them improve their service levels, reduce capital expense and deal with the rising costs of bandwidth, energy, real estate, staff and expertise. As a pioneer in utility computing, Savvis understands and harnesses the latest advances in technology like virtualization, cloud computing and support process automation.
