Extended Care DBA Services: SQL**Microsoft® SQL Server® Managed Services and Database Administrator (DBA) Support**

Does the idea of an experienced team of certified professionals managing your database systems around the clock appeal to you? With Savvis Extended Care Services, we offer affordable, reliable SQL-Server database support provided by our team of certified database administrators.

Don't just take our word for it. Since 1998, we have focused on providing the highest levels of service and expertise for our customers — both onsite and remote DBA services. We continue to support mission-critical production SQL-Server databases covering several generations through MS-SQL 2005 on all platforms.

“The Savvis team made me feel like I was their only customer, focusing on my needs and the needs of my company, taking ownership as if they were an extended part of my team.”

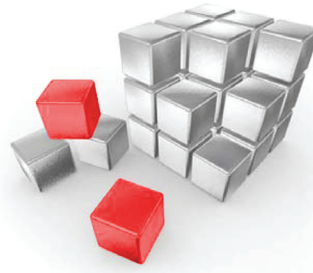

— Savvis Managed Hosting Customer in the Healthcare Industry

Savvis handles proactive maintenance, monitoring, and responding to your database system alerts so that you can focus on what it takes to grow your business. We offer a number of flexible support options so that you can select the most cost-effective plan for you based on your particular needs for Oracle database support — from part-time DBA work to full-time support on special projects that occasionally arise.

Our database experts have a minimum of 10 years of experience, and we've been serving our customers since 1998. This experience means that we know how important your Oracle systems are to your success. We'll focus on keeping your systems running smoothly and maintaining ongoing communication with you.

Our Proactive Approach

To be proactive and keep systems running smoothly, it takes the right combination of skills, experience, and the proper tools. The certified DBAs on our team maintain ongoing communication with you regarding your database operations and goals. Our focus is on doing things right the first time in order to avoid performance issues, data loss, or downtime.

**Key Features**

- Named primary & secondary DBA's knowledgeable about your environment
- Daily check-in Experienced DBA provides recommendations for database care
- Comprehensive monthly reviews and reports
- 24/7 availability with defined response time
- Proactive database maintenance with constant database monitoring and alert notification
- Onsite and offsite flexibility
- Includes consulting tasks each month for proactive maintenance or special projects
- Customized flexible services to meet unique needs
- Full database administration and outsourcing

In addition to setting your systems up properly and making sure you have the level of availability required along with a tested backup and recovery plan, we feel it's critical to monitor a variety of metrics to make sure your database continues operating smoothly. With our custom-built tools we can track database performance over time and plan ahead for increased capacity needs. For example, if a developer submits new code that taxes your system, we'll know it quickly.

Our methodology helps us proactively assess your database systems and make adjustments to avoid a crisis. If a critical problem does arise, we know about it very quickly. The goal of our service is to keep your systems running smoothly and provide the level of expertise you need to quickly resolve any database problem that may occur.

Our Team Experience

You can trust Savvis with specialized remote DBA services, part-time DBA support, and onsite database support for your mission-critical systems. Since 1998, we have been providing database consulting in Linux[®], and Windows[®] environments.
