

PROFESSIONAL SERVICES

Log-Size Evaluation Support Service

Overview

Savvis Professional Services provides a Log-Size Evaluation Support Service for clients who are planning to purchase Savvis' Log Management Service (LMS). Savvis Log-Size Evaluation help you select the appropriate LMS services, especially if you lack internal expertise or the time that is required to determine which components of your IT environments integrate directly with Savvis' LMS. Savvis Professional Services has the expertise to help your organization properly size its devices, helping you to reduce potential over-sizing costs and benefit from an overall design that will best serve your unique requirements.

Sizing Service

Savvis Professional Services can assist you to:

Determine Logging Sources, by:

- Reviewing all of the devices in your environment
- Determining what data the devices must log in order to meet your security requirements
- Determining the level at which devices must log in order to meet your security requirements

Upon completion, Savvis Professional Services will deliver a list of logging sources and the level at which each device must log.

Determine events per second, by:

- Gathering sample logs from each logging source for an established period of time
- Establishing the average number of events per second each device is generating

After determining the events per second, Savvis Professional Services will provide you with a list of logging sources and their average event-per-second rates.

Create proper design for Log Management placement, by:

- Determining how many log management devices will be required based upon your organization's current network design
- Determining the size of log management devices, based on events-per-second received

Key features

- Leverage Savvis' Professional Services Log Management experience to properly size devices for your Log Management Service (LMS)

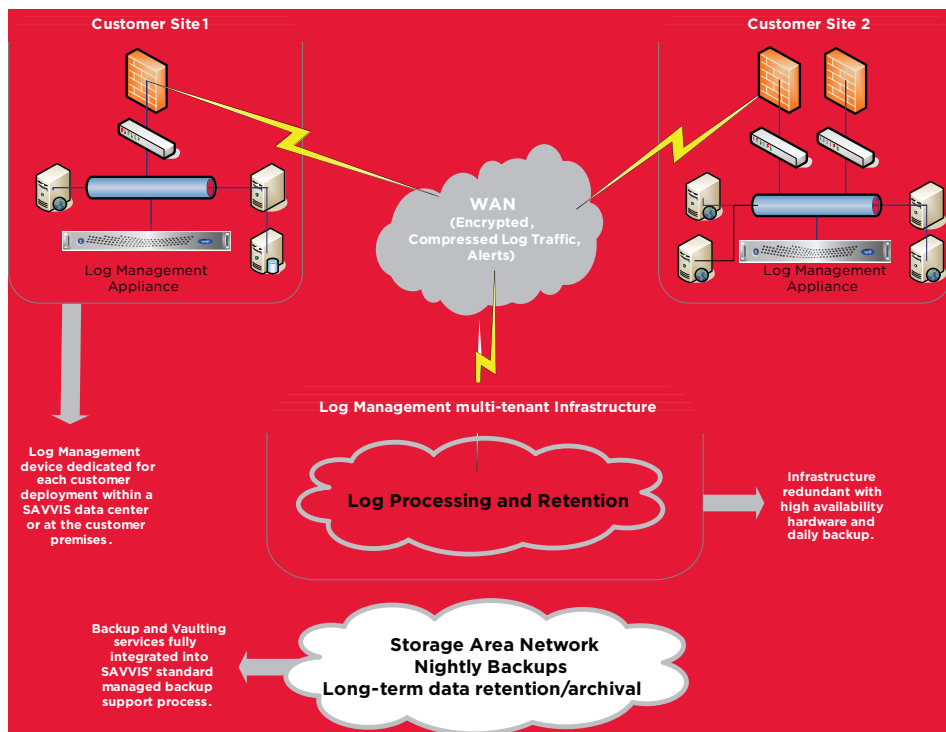

Key Benefits

- Reduce potential costs associated with over-sizing by properly setting logging levels for your organization's security and compliance requirements
- Review design recommendations that are based on your unique requirements
- Verify that required devices are logging for compliance purposes

More About LMS

For more information about how Savvis' Log Management Service can provide you with a valuable tool to help your organization address its security requirements, see Log Management Service Overview.

While providing guidance about the proper design for log management placement, Savvis Professional Services will deliver a list of log management devices required and their sizes, along with a diagram of the recommended log management device placement in your network.

About Savvis

Savvis, Inc. (NASDAQ:SVVS) is an outsourcing provider of managed computing and network infrastructure for IT applications. By outsourcing to Savvis, enterprises can focus on their core business while Savvis ensures the quality of their IT infrastructure. Leading IT organizations around the world have selected Savvis to help them improve their service levels, reduce capital expense and deal with the rising costs of bandwidth, energy, real estate, staff and expertise. As a pioneer in utility computing, Savvis understands and harnesses the latest advances in technology like virtualization, cloud computing and support process automation.
